

## Christian Literary Texts in Manuscripts of Second & Third Centuries

From L. W. Hurtado, *The Earliest Christian Artifacts:*

*Manuscripts and Christian Origins* (Grand Rapids: Eerdmans, 2006),

Appendix 1, pp. 209-229. Latest update 07 January 2011

The arrangement is by text, under broad headings, e.g., “Old Testament”. Manuscripts that contain more than one text (except for manuscripts of the Minor Prophets) are cited for each text, with cross-references to the boldface-numbers of the other texts on this list. In the “Identification” column, each manuscript is identified using a standard papyrological reference, with other identifiers as appropriate. “LDAB” = the online Leuven Database of Ancient Books, the number cited being their catalogue listing. “VH” = the item-number assigned a manuscript in the van Haelst catalogue. Old Testament items will have a “Rahlfs” number, as assigned in the Rahlfs *Verzeichnis*. Items marked with \* are Jewish manuscripts listed for interest/comparison; and \*\* = items with some question about their dating, genre, or other matter, including some that are difficult to identify as to whether Christian or Jewish. Information in the “Comments” box is not systematically supplied for each manuscript, but reflects only my own information and choices of what seemed relevant here. Likewise, I have supplied estimated page-sizes of some manuscripts (under “Form”), but have not been able to do so systematically for all items listed.

Other relevant online lists include these:
